Virginia Beach Va
1016 Crowell Avenue
757-545-4929

Caron East Inc. has recently added 3 more bases to our CaronNet RTK reference network. They are located in York Pa, Norristown Pa, and Chestertown De and they bring our total to 38 making us the 2nd largest Topcon based GPS reference network in the country and the ONLY network in the area offering the benefits of GLONASS and GALILEO from EVERY base on the network.

What this means for you is a larger coverage area, shorter baselines and a higher level of performance than you can get from any other source. All of our stations log 5 sec data in 24 1 hr files daily and are available for free download at www.caroneast.com. Our redundant array of backup servers and automatic email system assures that our network is never offline and gives our IT staff all of the latest network conditions at their fingertips.

CaronNet RTK provides the highest quality data and is currently the only network in the area to offer both the GPS and Glonass constellations on every base station in the network. We have also taken steps to prepare for upcoming advancements by incorporating L1, L2, L5 tracking and the Galileo constellation as well.

Give us a call today and let our team of professionals show you how good it can be with Caron East and CaronNet RTK.
