

GeoSLAM

GeoSLAM is a market leader in 3D geospatial technology solutions. Our unique "go-anywhere" technology is adaptable to all environments especially spaces that are indoor, underground or difficult to access, providing accurate 3D mapping without the need for GPS.

We design and manufacture world-leading technology solutions that deliver rapid results and save time and money. Easy to install and use, within minutes you can build a highly accurate 3D model of any environment.

Our journey so far

66 GeoSLAM technology was at the top of our list to scan our heritage project due to its speed and range \$9

Historic England

Our future

66 Technology is driving us further forward each day, in every part of our lives.

At GeoSLAM that's no different, we're on a journey to transform industries, digitalise workflows and engineer solutions that save time, money and increasingly deliver competitive advantage to our customers. From the launch of the ZEB1 in 2013 to today, the rapid speed of adoption of our technology is staggering.

Talk to us about how we can drive your world further forward, faster. >>
Shelley Copsey. CEO

Capture

Technical specification

Handheld Backpack	I UAV Ready
Range	100m
Protection Class	IP54
Scanner Weight	1.3kg
Points per Second	300,000
Relative Accuracy	1 - 3cm
Raw Data File Size	100-200MB a minute
Processing	Post Processing
Battery Life	3.5hrs

Effortless Data Capture

Your tool to capture, view and understand the world around you.

Great for indoor and outdoor use, including spaces where features are positioned further apart.

Lightweight and rugged, simple to use, fast to capture and easy to process giving you the most accurate information you need to make the most important decisions.

NEW Calculate the tonnage of stockpiles with GeoSLAM Volumes software.

66 High quality data captured 8 times faster than using traditional methods 99

Geocentar d.o.o.

Geocentar used the ZEB HORIZON for a recent forestry project.

Data was accurate to 3cm and they were able to save a huge 15 hours in the field, leading to significant cost savings.

Technical specification

Real-time data processing i reduce occidsions		
Range	30m	
Protection Class	IP51	
Scanner Weight	850g	
Points per Second	43,000	
Relative Accuracy	1 - 3cm	
Raw Data File Size	100MB a minute	

Real-time

1.5hrs

Capture with Confidence

Scan, process and track your progress as you go.

The ZEB-REVO RT is handheld, lightweight and easy to use, allowing you to rapidly build highly accurate 3D pointclouds within minutes, while on the move.

Gain real-time insight into your scan, see the areas you've covered (or missed) and the route you've taken before you leave site. Simple, comprehensive SLAM for everyone.

With the necessary accuracy and is much more time efficient than other laser scanning technologies ??

Entropy Group LLC

Using the ZEB REVO RT on a first responder exercise, Entropy Group reduced response times of law enforcement officers by 21%

^{*}reference plate sold separately

Technical specification

Handheld Backpack	
Range	30m
Protection Class	IP64
Scanner Weight	850g
Points per Second	43,000
Relative Accuracy	1 - 3cm
Raw Data File Size	100MB a minute
Processing	Post Processing
Battery Life	4hrs

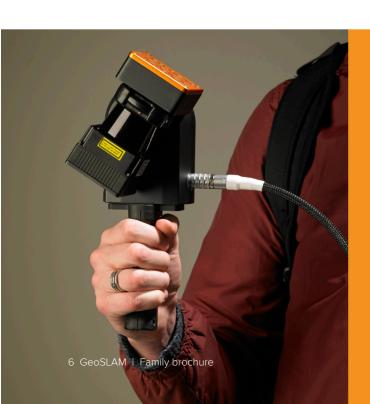

^{*}reference plate sold separately

Rugged and Reliable

The dependable lightweight, handheld scanner, take it with you wherever you go.

With it's IP64 rating and simple operation, the ZEB-REVO is ideal for harsh environments from underground mines to intricate caves.

Complete whole surveys in minutes not hours. Share data quickly and easily thanks to minimal data file sizes.

We've always been confident in our ability to keep our projects to the nearest inch or less. In bringing the ZEB REVO into our arsenal of tools, we've kept the accuracy we've always had, but introduced an efficiency that allows our experts to get out there and do more for our clients ??

Precision Property Measurements

The future of integration is here

LiDAR and high resolution imagery from our first generation ZEB Discovery for rapid urban mapping.

ZEB

Capture and create real estate floorplans with interactive 360° panoramic photography for enhanced property surveys.

The ZEB PANO uses our leading SLAM algorithm to automatically and accurately position panoramic photos on a floorplan for an interactive viewing experience.

Already used by leading property marketing companies, the ZEB PANO is set to revolutionise the real estate surveying industry.

- Quick and easy property surveying
- No need to send seperate teams to a property
- Error free data and high-resolution panoramic photography
- ▶ 360° interactive digital data
- ► Stop and go camera operation

ZEB

Take your ZEB HORIZON to the skies with the UAV mount. Capture from new heights with improved relative accuracy without the need for an IMU, even in areas with no GPS.

Sold as an accessory to go alongside the ZEB HORIZON, with a range of 100m and payload of 3.7kg, the ZEB HORIZON is great for airborne applications.

ZEB HORIZON is your tool to capture, process and understand the world around you.

Backpack

Compact and lightweight, the backpack neatly holds your scanner and accessories.
Carry out scans with the data logger stowed inside.

Hard case

Offers ruggedised protection for your scanner and accessories. IP67 rated and waterproof. Travels as hand luggage on most airlines.

ZEB-CAM

ZEB-CAM is a simple add-on option for any ZEB Family member that adds vision, context and colour to your 3D data.

Multi Level Deployment

Robust cradle allows the scanner to be lowered. A lightweight carbon fibre pole reaches heights that are difficult to access.

Reference Plate

Gather control points precisely with the reference plate, simplifying the georeferencing process in GeoSLAM Draw.

Backpack mounts

In some environments, such as difficult to reach or unsafe areas, hands free working is required.

Spherical Targets

Using targets with tribrach adapters you can accurately georeference your ZEB Data.

Process

The complete software solution for GeoSLAM Data

GeoSLAM Hub is a comprehensive software suite that transforms 3D point cloud data into actionable information and valuable deliverables.

As part of GeoSLAM's complete solution, GeoSLAM Hub brings together industry leading SLAM with powerful post processing functionality to deliver complete end to end solutions.

- SLAM processing to generate accurate 3D point clouds from mobile data
- Automatic registration of multiple scans and geo-referencing of datasets to control
- Import, view and interrogate data captured from all GeoSLAM mobile mapping devices
- Quick and easy workflows with 'drag and drop' functionality produce deliverables in minutes

- User definable parameters for enhanced SLAM processing
- Ability to visualise synched imagery data captured from ZEB CAM
- Provides survey-grade data accuracy

Deliverables

GeoSLAM Hub includes simple to use tools for quickly extracting floor plans and sections from point cloud data. It's available in several sector packages.

- Create 2D plans, sections and elevations from 3D pointcloud data in minutes
- Automatic vectorization of 2D lines allows for rapid floorplan creation
- Publish, share and collaborate with multiple stakeholders
- ► Easily export data for use in third party CAD and GIS software packages
- Provides survey-grade data accuracy

See more in our GeoSLAM Hub brochure.
